On July 1, 2011, I filed a Motion to oppose the Postal Service's request to redact the number of customers served by the Nooksack Post Office. It has now been over two months and no ruling has been issued. It is noted that Commission's Order Number 783 issued on July 29, 2011, resolved a similar request in Docket A2011-18.

Earlier today, the United States Postal Service filed an Application for Non-public Status of certain material in the above referenced Docket. One of the items that was redacted in the public filing was the number of customers being served by the Nooksack Branch.¹ The number of served customers for any given box section/carrier route is now provided on the USPS website.²

The number of customers that are being affected by the discontinuance of a facility will be an important factor to be considered and should be available for participants to utilize in their pleadings.

The redaction of this information should be removed and made public since it is already public. It is also noted that similar redactions probably exist in other similar dockets.
